

critically **compare**
treatments

explain risks and
benefits to patients

find evidence
more efficiently

untangle evidence
from hype

Be better equipped to make choices about **new medicines**

Finding Evidence — Recognising Hype is a new online learning program for general practitioners. It's designed to improve your skills and confidence in assessing new medicines.

What you will learn

This case-based program, developed by the National Prescribing Service Ltd, focuses on the key skills needed to make informed decisions about new medicines.

What the program offers

- 6 hours of interactive, self-paced learning
- skills in connecting questions about new medicines to research evidence
- use of high quality resources and tools for evidence-based prescribing
- effective ways to communicate the risks and benefits of treatment options to patients
- skills in appraising clinical trials
- a critical look at the role of promotional materials in prescribing
- confidence in locating information that meets your needs

Earn Professional Development Points

This activity has been approved in the 2008–2010 triennium by:

- the RACGP QA&CPD program:
40 points (Category 1)
- the ACRRM PD program:
6 ALS PDP points

How do you start?

Register at <http://nps.lamsinternational.com>

Create an account (it's free) with the NPS online learning site then choose *Finding Evidence — Recognising Hype* in the course categories list.

National Prescribing Service Limited

NPS is an independent, not-for-profit organisation for quality use of medicines funded by the Australian Government Department of Health and Ageing.
