

Correction

Prescribing for transgender patients [Correction]

<https://doi.org/10.18773/austprescr.2019.053>

First published 4 July 2019

The article on prescribing for transgender patients ([Aust Prescr 2019;42:10-3](#)) has been corrected.

In the second paragraph of the 'Monitoring' section, the target estradiol level for transwomen on treatment should be 400–700 pmol/L (not 400–700 mmol/L).
