

MEDICAL DIRECTOR: GPMP, TCA OR CVC

Proportion of patients with heart failure who have a GPMP or TCA or CVC program developed or reviewed in the last 12 months

1. Create cohort 1: **Heart failure** terms as described in **MD: Creating 3 separate cohorts**. *Before pressing the search button*, add the next parameters.
2. In the Drug/Condition section of the screen, click on the Condition radio button, In the entry field type **GPMP**. Select the first term in the list and click **Add to search criteria**.
3. To select ALL **GPMP** terms click on the **OR** checkbox, and hold **Ctrl** or **Shift** and select the remaining **GPMP** terms. Click **Add to search criteria** and they will appear in the Search Criteria section at the bottom of the screen.
4. With the **Condition** radio button still checked, type **TCA** in the entry field. Select the first term in the list. Click **Add to search criteria**.
5. To select ALL **TCA** terms click on the **OR** checkbox, and hold **Ctrl** or **Shift** and select the remaining **TCA** terms. Click **Add to search criteria**. Repeat process again to include **CVC program** terms. These terms will now appear in the Search Criteria section at the bottom of the screen.
6. In the **Visit section** of the screen check the **Seen by any doctor** checkbox.
7. At the “From” date chooser select your query start date. Tick the check box and leave the day/month the same. Change the year to the previous year (ie, 12 months ago).
8. At the “To” date chooser tick the check box to select today’s date.
9. Press the **Search** button. A screen of all patients who match the search will display.
10. Click on the **Save** button to save the search eg, **GPMP_TCA.DBF**

To find the proportion of patients with heart failure with a GPMP/ TCA/ CVC program developed or recorded in the last 12 months:

Find the total the number of patients generated on the report for cohort 1 and the total number of patients generated for the report for cohort 1 with GPMP/TCA/ CVC program in the last 12 months.

Complete the calculation: Total number cohort 1 with GPMP/TCA/ CVC program in the last 12 months / Total number cohort 1
