

## Portal home page

When you enter the NMS 2020 virtual portal, there is a lot to see and check out. **The most important thing is the timeline** as this shows all of the different presentations, sessions and functions that make up your program. The times in the timeline will show in local time.

If you pre-registered for a break out session, this will appear on your timeline. If you did not register for these, they will not appear.

Click on any session or function and on the right-hand side you will see the session information which will include the presenter details or session overview.

On the right hand side of the portal, you will be able to connect with other attendees through the meeting hub and view the ePosters. Further information on these modules will be provided over the next few days.

Please take some time now to explore the virtual portal.
