5. What should I know while taking SITAGLIPTIN/METFORMIN MYLAN?
6. Are there any side effects?
7. Product details

1. Why am I taking SITAGLIPTIN/METFORMIN MYLAN?

SITAGLIPTIN/METFORMIN MYLAN contains two active ingredients: sitagliptin and metformin. Sitagliptin is a member of a class of medicines you take by mouth called DPP-4 inhibitors (dipeptidyl peptidase-4 inhibitors)

and metformin which belongs to a class of medicines called biguanides. Sitagliptin and metformin work together to control blood sugar levels in adults with type 2 diabetes mellitus.

SITAGLIPTIN/METFORMIN MYLAN is used to lower blood sugar levels in adults with type 2 diabetes mellitus.

SITAGLIPTIN/METFORMIN MYLAN can be taken alone or in combination with certain other medicines that lower blood sugar along with a recommended diet and exercise program.

2. What should I know before I take SITAGLIPTIN/METFORMIN MYLAN?
