3. What if I am taking other medicines?
4. How do I use Azacitidine MSN?
5. What should I know while using Azacitidine MSN?
6. Are there any side effects?
7. Product details

1. Why am I using Azacitidine MSN?

Azacitidine MSN contains the active ingredient azacitidine.

Azacitidine MSN is an anti-cancer agent. Azacitidine MSN prevents the growth of cancer cells. Azacitidine MSN has been prescribed by your doctor for the treatment of myelodysplastic syndrome (MDS). Myelodysplastic syndrome is a blood disorder in which the bone marrow is not working normally and does not produce enough mature blood cells.

This causes a lack of healthy blood cells that can function properly in the body.

Ask your doctor if you have any questions about how Azacitidine MSN works, or why this medicine has been prescribed for you.

Your doctor may have prescribed it for another reason. Azacitidine MSN will only be prescribed to you by a doctor who has experience in medicines to treat cancers of the blood.
