- 1. Why am I using Tenofovir/Emtricitabine Sandoz 301/200?

## Tenofovir/Emtricitabine Sandoz 301/200 contains the active ingredients tenofovir disoproxil succinate and emtrictaibine.

Tenofovir/Emtricitabine Sandoz 301/200 belong to a group of antiviral medicines known as nucleoside and nucleotide reverse transcriptase inhibitors (NRTI).

Tenofovir/Emtricitabine Sandoz 301/200 is used to treat Human Immunideficiency Virus-1 (HIV-1) infection in adults when taken in combination with other anti-HIV medicines and to help reduce the risk of getting HIV infection when used with safer sex practices in:

- HIV-negative men who have sex with men, who are at high risk of getting infected with HIV-1 through sex.
- Male-female sex partners when one partner has HIV-1 infection and the other does not.

When Tenofovir/Emtricitabine Sandoz 301/200 is used to treat HIV infection:

When used with other HIV-1 medicines to treat HIV-1 infection, Tenofovir/Emtricitabine Sandoz 301/200 may help:

 Reduce the amount of HIV-1 in your blood. This is called "viral load".
