Where to find information in this leaflet:

1. Why am I using EZECREST COMPOSITE PACK?

2. What should I know before I use EZECREST COMPOSITE PACK?

3. What if I am taking other medicines?

4. How do I use EZECREST COMPOSITE PACK?

5. What should I know while using EZECREST COMPOSITE PACK?

6. Are there any side effects?

7. Product details

1. Why am I using EZECREST COMPOSITE PACK?

EZECREST COMPOSITE PACK helps to lower cholesterol levels. It is used in people whose cholesterol levels are too high and when diet alone cannot lower these levels adequately.

What is high cholesterol

Cholesterol is one of several fatty substances found in the bloodstream. Your total cholesterol is made up mainly of LDL and HDL cholesterol. LDL cholesterol is often called “bad” cholesterol because it can build up in the walls of your arteries forming plaque. Eventually this plaque buildup can lead to a narrowing of the arteries. This narrowing can slow or block blood flow to vital organs such as the heart and brain. This blocking of blood flow can result in a heart attack or stroke. HDL cholesterol is often called “good” cholesterol because it helps keep the bad cholesterol from building up in the arteries and protects against heart disease.

How EZECREST COMPOSITE PACK works

EZECREST COMPOSITE PACK is a combination pack, which contains two different medicines. One is PHARMACOR EZETIMIBE (ezetimibe) and the other is PHARMACOR ROSUVASTATIN (rosuvastatin calcium). EZECREST COMPOSITE PACK reduces elevated total-cholesterol, LDL ('bad') cholesterol and increases HDL ('good') cholesterol. EZECREST COMPOSITE PACK works by decreasing the absorption of cholesterol in the small intestine and by reducing the amount of cholesterol made in the liver. Your doctor may have prescribed EZECREST COMPOSITE PACK or another reason. Ask your doctor if you have any questions about why EZECREST COMPOSITE PACK has been prescribed for you. EZECREST COMPOSITE PACK is not addictive. EZECREST COMPOSITE PACK is available only with a doctor's prescription.

Use in children

EZECREST COMPOSITE PACK is not recommended for use in children.

2. What should I know before I use EZECREST COMPOSITE PACK?

Do not take EZECREST COMPOSITE PACK if:
