

BTC Candesartan HCT

Active ingredient(s): candesartan cilexetil and hydrochlorothiazide

Consumer Medicine Information

This leaflet provides important information about using BTC Candesartan HCT. **You should also speak to your doctor or pharmacist if you would like further information or if you have any concerns or questions about using BTC Candesartan HCT.**

BTC Candesartan HCT is used to treat high blood pressure.

Where to find information in this leaflet:

1. Why am I using BTC Candesartan HCT?
2. What should I know before I use BTC Candesartan HCT?
3. What if I am taking other medicines?
4. How do I use BTC Candesartan HCT?
5. What should I know while using BTC Candesartan HCT?
6. Are there any side effects?
7. Product details

1. Why am I using BTC Candesartan HCT?

BTC Candesartan HCT contains the active ingredient candesartan cilexetil and hydrochlorothiazide.

Candesartan cilexetil belongs to a group of medicines called angiotensin II - receptor antagonists (or blocker). It works by causing relaxation of blood vessels.

Hydrochlorothiazide belongs to a group of medicines called diuretics. It works by reducing the amount of excess fluid in the body.

Using these two medicines together will lower your blood pressure more than using either one on its own.
