pressure stays higher than normal, even when you are calm or relaxed.

There are usually no symptoms of hypertension. The only way of knowing if you have hypertension is to have your blood pressure checked regularly. If high blood pressure is not treated it can lead to serious health problems, including stroke, heart disease and kidney failure.

Ask your doctor if you have any questions about why it has been prescribed for you.

Your doctor may have prescribed MOXONIDINE VIATRIS for another use.

1. Why am I taking MOXONIDINE VIATRIS?

MOXONIDINE VIATRIS contains the active ingredient **moxonidine**.

MOXONIDINE VIATRIS is used to lower high blood pressure, which is sometimes called **hypertension**.

Everyone has blood pressure. This pressure helps to move your blood around your body. Your blood pressure may change at different times of the day. You have hypertension when your blood
