4. How do I take Pomalidomide Sandoz?
5. What should I know while taking Pomalidomide Sandoz?
6. Are there any side effects?
7. Product details

1. Why am I taking Pomalidomide Sandoz?

Pomalidomide Sandoz contains the active ingredient pomalidomide.

Pomalidomide Sandoz is an immunomodulating agent.

Pomalidomide Sandoz is used in combination with another medicine called 'dexamethasone' (steroid medicine) to treat adult patients diagnosed with Multiple Myeloma (MM) (a cancer of the bone marrow). It is prescribed for patients whose disease has progressed after two prior therapies.

Pomalidomide Sandoz is also used in combination with dexamethasone and another medicine called 'bortezomib' to treat adult MM patients whose disease has progressed after one therapy.

2. What should I know before I take Pomalidomide Sandoz?

Warnings

Do not take Pomalidomide Sandoz if:

you are allergic to pomalidomide, or any of the ingredients listed at the end of this leaflet.
