Meloxicam-WGR contains the active ingredient meloxicam. Meloxicam-WGR belongs to a group of medicines called nonsteroidal anti-inflammatory drugs (NSAIDs). These medicines work by relieving pain, swelling, and redness.

Meloxicam-WGR is used to treat the symptoms of:

- **Osteoarthritis (OA)** is a chronic disorder that causes damage to the cartilage and surrounding tissues and is characterized by pain, stiffness, and loss of function.
- **Rheumatoid arthritis (RA)** is an inflammatory arthritis in which joints, usually including those of the hands and feet, are inflamed, resulting in swelling, pain, and often destruction of joints.
