3. What if I am taking other medicines?
4. How do I use YONSA MPRED?
5. What should I know while using YONSA MPRED?
6. Are there any side effects?
7. Product details

1. Why am I using YONSA MPRED?

YONSA MPRED is a combination pack which contains two different medicines, YONSA tablets and Methylprednisolone tablets. YONSA tablets contain the active ingredient abiraterone acetate and Methylprednisolone tablets contain the active ingredient methylprednisolone.

- Abiraterone acetate works by reducing the levels of male sex hormones in your body, including testosterone.
- Methylprednisolone is a corticosteroid that must be taken to reduce the chance of

developing low blood pressure, heart effects or low levels of potassium in your blood while you are using YONSA tablets.

YONSA MPRED is used to treat prostate cancer that has spread to other parts of the body.

2. What should I know before I use YONSA MPRED?

Warnings

Do not use YONSA MPRED if:

- you are allergic to abiraterone acetate, methylprednisolone or any of the ingredients listed at the end of this leaflet. Always check the ingredients to make sure you can use this medicine.
- if you have severe liver failure.
- If you are being treated with XOFIGO (radium 223 dichloride), a radiation therapy used for prostate cancer
- If you are pregnant or may potentially be pregnant
- if you have an infection or if you have recently been given a vaccine
