

BRICALOR

[Ticagrelor]

Consumer Medicine Information

This leaflet provides important information about using [BRICALOR]. **You should also speak to your doctor or pharmacist if you would like further information or if you have any concerns or questions about using [BRICALOR].**

Where to find information in this leaflet:

1. Why am I using BRICALOR?
2. What should I know before I use BRICALOR?
3. What if I am taking other medicines?
4. How do I use BRICALOR?
5. What should I know while using BRICALOR?
6. Are there any side effects?
7. Product details

1. Why am I using BRICALOR?

BRICALOR contains the active ingredient ticagrelor.

BRICALOR belongs to a group of medicines called anti-platelet medicines.

Platelets are very small cells in your blood that help to stop bleeding. When a blood vessel is damaged, they clump together to help form a blood clot. This stops bleeding. However, clots can also form inside a damaged blood vessel. This can be very dangerous because:

- the clot can cut off the blood supply completely - this can cause a heart attack (myocardial infarction) or stroke.
- the clot can partly block the blood vessels to the heart - this reduces the blood flow to the heart.
