#### 1. Why am I using AZITHROMYCIN MEDSURGE?

---

**AZITHROMYCIN contains the active ingredient Azithromycin.** Azithromycin is an antibiotic which belongs to a group of medicines called azalides.

The azalides are a sub-class of a group of antibiotics called macrolides.

Azithromycin is used to treat pneumonia, a lung infection caused by certain bacteria including *Legionella pneumophila*.

AZITHROMYCIN MEDSURGE works by killing or stopping the growth of bacteria causing your infection. AZITHROMYCIN MEDSURGE will not work against viral infections such as colds or flu.
