1. Why am I using NEXTSTELLIS?

NEXTSTELLIS is a birth control tablet (oral contraceptive) used by women to prevent pregnancy.

NEXTSTELLIS contains the active ingredients estetrol (as estetrol monohydrate) and drospirenone.

The estetrol (also called E4) in NEXTSTELLIS is made from a plant source to match the naturally occurring estrogen in the body. E4 has highly selective action on estrogen receptors. Drospirenone is a synthetic version of another naturally occurring female reproductive hormone.
