3. What if I am taking other medicines?
4. How do I use ATOVACUE?
5. What should I know while using ATOVACUE?
6. Are there any side effects?
7. Product details

---

### 1. Why am I using ATOVACUE?

---

**ATOVACUE contains the active ingredient atovaquone.**

ATOVACUE belongs to a group of medicines called anti-infectives.

**ATOVACUE oral suspension is used to treat a type of pneumonia (lung infection) caused by *Pneumocystis carinii*.**

*Pneumocystis carinii* is a parasite that can lie dormant in the airways unless the body's immune system becomes weakened, for example in human immunodeficiency virus (HIV) infection. This can lead to *Pneumocystis carinii* pneumonia (PCP).

ATOVACUE suspension works by interfering with important functions within *Pneumocystis carinii*.

Your doctor may have prescribed ATOVACUE suspension for another reason.

Ask your doctor if you have any questions about why ATOVACUE suspension has been prescribed for you.

This medicine is available only with a doctor's prescription.

ATOVACUE suspension is not addictive.

---

### 2. What should I know before I use ATOVACUE?

---

#### *Warnings*

**Do not use ATOVACUE if:**

- you are allergic to atovaquone, or any of the ingredients listed at the end of this leaflet.
- Always check the ingredients to make sure you can use this medicine.
- you are pregnant, trying to become pregnant or breastfeeding, unless your doctor says you should.
