4. How do I use Risperidone Lupin?
5. What should I know while using Risperidone Lupin?
6. Are there any side effects?
7. Product details

1. Why am I using Risperidone Lupin?

Risperidone Lupin contains the active ingredient risperidone. Risperidone Lupin belongs to a group of medicines called antipsychotic agents which improve the symptoms of certain types of mental illness

Risperidone Lupin is used for:

- treatment of sudden (acute) and long-term (chronic) schizophrenia and other types of related psychoses. These are disorders related to thought, feeling and/or action.
- short-term treatment of acute mania associated with bipolar 1 disorder. This condition is characterised by symptoms such as elevated, expansive or irritable mood, inflated self-esteem, decreased need for sleep, pressured speech, racing thoughts, distractibility or poor judgement including disruptive or aggressive behaviours.
- treatment of behavioural problems in patients with a decline in mental ability(dementia) caused by Alzheimer's disease. These problems include: aggression through words or action, morbid suspiciousness, agitation or wandering.
- treatment of conduct and other disruptive behaviours such as aggression, impulsiveness and self-injury in children (over 5 years old), adolescents and adults who are intellectually disabled.
- treatment of behavioural symptoms of autism in children and adolescent.
