

Sertra

Active ingredient: *sertraline hydrochloride*

Consumer Medicine Information

This leaflet provides important information about using SERTRA. **You should also speak to your doctor or pharmacist if you would like further information or if you have any concerns or questions about using SERTRA.**

Where to find information in this leaflet:

1. Why am I using SERTRA?
2. What should I know before I use SERTRA?
3. What if I am taking other medicines?
4. How do I use SERTRA?
5. What should I know while using SERTRA?
6. Are there any side effects?
7. Product details

1. Why am I using SERTRA?

SERTRA contains the active ingredient sertraline hydrochloride. SERTRA belongs to a group of medicines called selective serotonin reuptake inhibitors (SSRIs). They are thought to work by blocking the uptake of a chemical called serotonin into nerve cells in the brain. Serotonin and other chemicals called amines are involved in controlling mood.

Your doctor, however, may prescribe SERTRA for another purpose.
