1. Why am I using KERENDIA?
2. What should I know before I use KERENDIA?
3. What if I am taking other medicines?
4. How do I use KERENDIA?
5. What should I know while using KERENDIA?
6. Are there any side effects?
7. Product details

1. Why am I using KERENDIA?

KERENDIA contains the active ingredient finerenone.

Finerenone is a nonsteroidal mineralocorticoid receptor antagonist (MRA). It works by blocking hormones that can damage the kidneys and heart.

KERENDIA is used to treat adults with chronic kidney disease and type 2 diabetes. Chronic kidney disease is when your kidneys keep getting worse at removing waste and fluids from your blood. Type 2 diabetes is when your body cannot keep your blood sugar levels normal.

KERENDIA slows the worsening of kidney damage.
