3. What if I am taking other medicines?
4. How do I use MIRTAZAPINE-WGR?
5. What should I know while using MIRTAZAPINE-WGR?
6. Are there any side effects?
7. Product details

1. Why am I using MIRTAZAPINE-WGR?

MIRTAZAPINE-WGR medicine contains the active ingredient Mirtazapine. This medicine corrects this chemical imbalance and may help relieve the symptoms of depression.

MIRTAZAPINE-WGR is used to treat depression including relapse prevention.

Depression is longer lasting or more severe than "low moods" everyone has from time to time due to the stress of everyday life. It is thought to be caused by a chemical imbalance in parts of the brain. This affects your whole body and can cause emotional and physical symptoms such as feeling low in spirit, loss of interest in activities, unable to enjoy life, poor appetite or overeating, disturbed sleep, often waking up early, loss of sex drive, lack of energy and feeling guilty over nothing.
