4. How do I take Ethambutol Lupin?
5. What should I know while take Ethambutol Lupin?
6. Are there any side effects?
7. Product details

1. Why am I taking Ethambutol Lupin?

Ethambutol Lupin contains the active ingredient ethambutol hydrochloride.

Ethambutol Lupin is an antibiotic that belongs to a group of medicines called antituberculosis drugs.

Ethambutol Lupin is used to treat all forms of tuberculosis (including tuberculosis of the lung, skin, genital tract, urinary tract, bone and joint, eye and the brain).

Your doctor may have prescribed Ethambutol Lupin for another purpose.

Ask your doctor if you have any questions about why it has been prescribed for you.

2. What should I know before I take Ethambutol Lupin?

Warnings

Do not take Ethambutol Lupin if:

- **you are allergic to ethambutol, or any of the ingredients listed at the end of this leaflet.**

Some of the symptoms of an allergic reaction to ethambutol may include:

- rash, itching or hives on the skin;
- swelling of the face, lips, tongue or other parts of the body;
- shortness of breath;
- wheezing or troubled breathing.

Always check the ingredients to make sure you can use this medicine.

Check with your doctor if you:
