3. What if I am taking other medicines?
4. How do I use Cyclogest?
5. What should I know while using Cyclogest?
6. Are there any side effects?
7. Product details

1. Why am I using Cyclogest?

Cyclogest contains the active ingredient progesterone.

Progesterone is a natural, female sex hormone, produced in the body. Progesterone is for women who need extra progesterone while undergoing treatment in an Assisted Reproductive Technology (ART) programme.

Progesterone acts on the lining of the womb and it helps you to become and to stay pregnant when you are treated for infertility.
